DEDICATION

To my parents and to our professor who made this accomplishment possible

ACKNOWLEDGMENTS

First and foremost, I would like to thank the Professor Dr. Engineer / Ahmed Ibrahim Saleh, for his support, outstanding guidance and encouragement throughout our project.

I would like to thank our family, especially my parents, for their encouragement, patience, and assistance over the years. We are forever indebted to our parents, who have always kept me in their prayers.

DEDICATION	**I**
ACKNOWLEDGMENTS	**II**
Index	**III**
CHAPTER 1: INTRODUCTION	**1**
i. Graduation Project	**1**
ii. Introduction to the guard	**1**
iii. Components to the guard	**1**
iv. Components to the guard	**1**
1.1. Introduction to Microcontroller	
1.1.1. Introduction	
1.1.2. Embedded Controller	
1.1.3. Microcontrollers and Microprocessors	
1.1.4. TYPES OF Microcontrollers	
1.1.4.1 The 8, 16 and 32-bit Microcontrollers	
1.1.4.2 Embedded and external memory microcontrollers embedded microcontrollers	
1.1.4.3 Microcontrollers architectural features	
1.1.4.3.1 Von-neuman architecture	
1.1.4.3.2 Harvard architecture	
1.1.4.3.3 CISC	
1.1.4.3.4 RISC	
1.1.4.3.5 SISC	
1.1.5. Microcontroller Applications	
1.1.6. Commercial microcontroller devices	
1.2 Intoduction to Arduino	
1.2.1 Introduction	
1.2.2 History	
1.2.3 Hardware	
1.2.4 Official boards	
1.2.5 Software	
1.2.6 Development	
1.2.7 Applications	
1.2.8 Ultrasonic transducer	
1.2.8.1 Capabilities and limitations	
1.2.8.2 Transducers	
1.2.8.3 Use in medicine	
1.2.8.4 Use in industry	
1.2.9 Wire	
1.2.9.1 History	
1.2.9.2 Uses	
1.2.9.3 Production	
1.2.9.4 Finishing, jacketing, and insulating	
1.2.9.5 Forms of wire	
1.2.9.5.1 Solid wire	
1.2.9.5.2 Stranded wire	
1.2.9.5.3 Braided wire	
1.2.9.5.4 Number of strands	
1.2.9.6 Varieties	

1.2.10 Buzzer
1.2.10.1 Mechanical
1.2.10.2 Electromechanical
1.2.10.3 Piezoelectric
1.2.10.4 A piezoelectric element
1.2.10.5 Uses
1.2.11 Electrical resistance and conductance
1.2.11.1 Introduction
1.2.11.2 Conductors and resistors
1.2.11.3 Ohm's law
1.2.11.4 Relation to resistivity and conductivity
1.2.11.4.1 What determines resistivity?
1.2.11.5 Measuring resistance
1.2.11.6 Typical resistances
1.2.11.7 Static and differential resistance
1.2.11.8 AC circuits
1.2.11.8.1 Impedance and admittance
1.2.11.8.2 Frequency dependence of resistance
1.2.11.9 Energy dissipation and Joule heating
1.2.11.10 Dependence of resistance on other conditions
1.2.11.10.1 Temperature dependence
1.2.11.10.2 Strain dependence
1.2.11.10.3 Light illumination dependence
1.2.11.11 Superconductivity
1.2.12 LED lamp
1.2.12.1 Technology overview
1.2.12.2 Application
1.2.12.3 Household LED lamps
1.2.12.3.1 Replacement for existing lighting
1.2.12.3.2 *Lamp sizes and bases*
1.2.12.3.3 *LED tube lamps*
1.2.12.3.4 Lighting designed for LEDs
1.2.12.4 Specialty uses
1.2.12.5 Comparison to other lighting technologies
1.2.12.5.1 Energy Star qualification
1.2.12.6 Limitations
1.2.12.6.1 Efficiency droop
1.2.12.7 Development and adoption history
1.2.12.7.1 Examples of early adoption
1.2.13 Breadboard
1.2.13.1 Evolution
1.2.13.1.1 Alternatives
1.2.13.2 Solderless breadboard
1.2.13.2.1 Typical specifications
1.2.13.2.2 Bus and terminal strips
1.2.13.2.2.1 Diagram
1.2.13.2.3 Jump wires
1.2.13.2.4 Advanced solderless breadboards
1.2.13.2.5 High frequencies and dead bugs
1.2.13.2.6 Limitations

CHAPTER 2:Introduction to security
CHAPTER 3: Components of the project
- **3.1 Arduino Mega 2560**
- **3.2 9V Battery Adapter for the Arduino**
- **3.3 High Quality Arduino USB programming Cable**
- **3.4 Sound Sensor (adjustable)**
- **3.5 PIR Motion sensor module (Adjustable Range)**
- **3.6 LM35DZ Temperature Sensor (Precision Centigrade)**
- **3.7 Smoke sensor Module MQ2 (Digital/Analog)**

CHAPTER 4: Explain the project
- **4.1 PIR Sensors**
  - **4.1.1 Step 1: Supplies**
  - **4.1.2 Step 2: Setup**
  - **4.1.3 Step 3: Code**
  - **4.1.4 Step 4: Further Projectse**
